About Our Company

Welcome to My Farming Days, Dedicated to Building A Self-Sustainable Farming System in the UAE

My Farming Days is run by a trailblazing couple with a passion for agriculture and the environment. Through our continued success and contributions to sustainable agriculture and local organic farming start-ups and organizations, we have over 10 years' experience dedicated to tackling some of the agricultural most common and complex challenges.

With a Master in Soil Science & Agricultural Chemistry and a Master in Agriculture Business Administration, our educational background is the backbone of our ethical practices and sustainable work.

Currently based in the UAE, we know what it takes to farm in extreme conditions, giving us all the more reason to combine our knowledge with the latest scientific and technology innovations while promoting sustainable farming methods.

At My Farming Days, we have a complete portfolio of end-to-end services to help you grow your farm, from land survey to produce marketing. Some of these services include:

- **Land planning.**
- **Land development (Preharvest):** sowing, irrigation, fertilization, harvesting.
- **Postharvest management:** sorting, grading, packing, dispatching, delivering & selling produce.

But our goal goes beyond promoting sustainable farming and producing local fresh produce that have low environmental impacts. We're also dedicated to building long-lasting relationships with our farmers, clients and partners, and by creating a strong network of global professionals, we believe we can have a positive impact on communities worldwide.

Through our ongoing work, we are paving the way for sustainable agriculture in the UAE, where local production and organic farming are at the heart of a modern society that recognizes the benefits of living a healthy lifestyle.
